

Email services supported by Verizon Wireless

Important information:

- These server settings were compiled on July 30th 2010. Check with your email provider for more recent updates.
- Choose Manual Setup when configuring email
- Choose connection type (POP/IMAP)
- Incoming Server is either the POP or IMAP server listed below
- Outgoing server name is usually devised by replacing POP by SMTP in the incoming server address
- Review the username field to determine if the username field on the device should contain the username only or the entire email address.
