

SOFTWARE UPDATE

GET THE MOST OUT OF YOUR DROID 3 BY MOTOROLA.

Verizon Wireless is pleased to announce a new software update, 5.7.906.XT862.Verizon.en.US.,

Verizon Wireless and Motorola encourage you to download this update.

Device Features

- + A Google Security Patch has been added to improve the security level.
- + Fixed issue where the device may power ON without user interaction.
- + Avoid device interruption when accessing an application prior to the storage being fully mounted on the device.
- + Improvements in device stability help avoid device power cycles.
- + When connected to a Bluetooth® headset or HDMI cable, the device will no longer lock up and power cycle.
- + Improvements to the camera's auto focus will reduce the shutter response time and enhance the quality of captured imagery.
- + Device is enabled with the Wireless Alerting System.

Call Features

- + Use a wired headset without the interruption of a high pitched tone.
- + Plus code dialing has been enhanced, improving the experience while traveling.

Applications & Widgets

- + Playback media can be heard while using a Bluetooth headset.
- + Place a call to the appropriate recipient using the contact widget.
- + When moving applications to the SD card, shortcuts to these Apps will remain.
- + After updating the contact database from the Messaging App, the Messaging UI will display the latest contact information.
- + Successfully post and play videos on Facebook.
- + Purchased ringtones are now able to be downloaded, saved and used where appropriate.
- + Contact pictures display properly in Google Voice.
- + VZ Navigator® 3D City is now preloaded.
- + Resolved excessive data usage and continuous downloading for VZ Navigator 3D City downloads.
