

SOFTWARE UPDATE

GET THE MOST OUT OF YOUR DROID BIONIC.

Verizon Wireless is pleased to announce a new software update, 5.9.902.XT875.Verizon.en.US, for your DROID BIONIC by Motorola.

Verizon Wireless and Motorola encourage you to download this update.

Device Features

- + Added support for National Plus Code Dialing.
- + Added support for Bluetooth® Personal Area Networks (PAN).
- + Receive text message alerts while on voice calls without voice call interruption.
- + Improved audio while streaming video to a TV using the HDMI connection.
- + Improved Bluetooth audio when paired and connected to the device.
- + Improvements in device stability prevent the following:
 - Black screen lockups
 - Camera multi-shot lockups
 - Idle resets
 - Multimedia dock lockups
- + Device is enabled with the Wireless Alerting System.
- + Improvements in battery life.

Data Connectivity

- + Data connectivity and stability improvements.
- + Improvements in Wi-Fi Mobile Hotspot download performance.

Application Improvements

- + YouTube videos will resume play from their previous location after pausing to access the Notification Panel.
- + Composing a Visual Voice Mail message no longer mutes the voice call.
- + Messages saved with Visual Voice Mail will store to the SD card target shown on the user interface.
- + Visual Voice Mail improvements for message storage and deletion.
- + Play WAV audio files.
- + The following apps are now preloaded:
 - Amazon MP3
 - VCAST Apps Store

4G LTE
